**Our School's
Weekly Memory
Verse for Week 33:**

Psalm 121:1-2
"I lift up my eyes to
the hills—where does
my help come from?
My help comes from
the Lord, the maker
of heaven and earth."

A Word from the Principal

The students are actively preparing an end of the year gift for you and your family! Students have been memorizing and reciting their parts to historic and patriotic orations, speeches, poems and songs in preparation for the Spring Revue. The Spring Revue this year will be a lively and God honoring salute to our men and women in uniform and the great nation they represent.

Students are assigned special parts to recite or sing, and this performance proves to be one of the greatest learning exercises of the year for them. The ability to stand in front of a big audience, speak into a microphone and remember memorized lines is not a small task! There are many adults who cannot perform at the level at which our students are learning to perform.

In addition, this opportunity serves as a culminating product of the many opportunities that they have been afforded over the school year. From reciting memory verses and poetry throughout the grammar stage, to presenting speeches and presentations throughout the subjects from 3rd-10th grade, the students have been learning the art of public speaking and persuasion.

We look forward to an evening when the whole school has the opportunity to perform together!

The evening of the Spring Revue is June 4th with specific details yet to come.

Non Nobis Domine,
Mrs. Reinhold, Lower School Principal

THIS WEEK AROUND CAMPUS

The Chorus Sea World Field Trip April 19th

It was a marvelous day of sharing our program "An American Songbook" and having fun at the park with family and friends. -Mrs. Kelly

The Second Grade field trip to Marineland was exciting and educational! Students were able to engage with the instructor on topics such as the food chain, symbiotic relationships and the importance of protecting our coral reefs and marine mammals. I was blown away by how much information the students had retained from our Marine Science class this year at the Academy. Students learned to work together and problem solve how to "rescue a dolphin". They truly have the potential to be future leaders and wildlife conservationists!
